

## Fossil

<https://collections.kitimatmuseum.ca/en/permalink/artifact574>

Object Type: gift

Quantity: 1

Description: Tertiary Fossils and Concretions, all rocks found in adjoining gully to Whittlesey Street. A check, however, did not prove conclusive. The material was most likely dumped with the topsoil and was lying on top of much younger material. Tertiary Plant Fossil very similar to Francois Lake (Meta Segnoia) Concretion (shale-like material) very similar to Smither-Buckley Valley year-old bridge.

Physical Condition: good

Accession Number: 973.25.1-13

Category: Natural History

Location: off-site storage
